Summary of Qualifications

Takes ownership of problems and sees them through to resolution. I'd rather automate something than repeat the same task over and over. I love monitoring and metrics and using data to make smart decisions. I find performance work and capacity planning especially interesting. I work well both on teams and alone.

Experience

Acquia, Inc. (Boston, MA) – Customer Site Reliability Engineer 8/2014 – Present

- Dedicated operations resource for large enterprise customer
- Maintain High Availability Infrastructure for customer sites & ensure uptime during high traffic events
